EDUCATION

MASTER OF COMPUTER APPLICATIONS (MCA)

Hindusthan College of Arts and Science, Coimbatore

CGPA: 8.1

BACHELOR OF BUSINESS ADMINISTRATION (BBA)

Kalaingar Karunanidhi Government Arts College,

Tiruvannamalai

CGPA: 7.3

PROFESSIONAL PROFILE

I am currently pursuing my MCA and have a strong interest in Frontend Development. I have good knowledge of HTML, CSS, JavaScript and React. I enjoy creating simple and responsive websites and have worked on academic and personal projects to improve my frontend skills. I am a quick learner and interested in learning new technologies. I am looking for an opportunity to start my career as a Frontend Developer and improve my skills through real-time projects.

PROFESSIONAL EXPERIENCE

Python Full Stack Development Intern

Nitroware Technologies, Coimbatore

- Completed my internship in Python Full Stack Development.
- Learned and worked on both frontend and backend development.
- Worked on developing and improving different features in web applications.
- Got practical experience in designing, developing, and testing projects.
- Improved my problem-solving skills and learned how to work as part of a team.

PROJECTS

Blogging Platform - MERN Stack

- Developed a blogging platform using **MongoDB, Express.js, React.js** and **Node.js**.
- Added features to create, edit and manage blog posts.
- Implemented JWT authentication for secure login and user management.
- Created a responsive React frontend and integrated REST APIs.
- Implemented CRUD operations and database integration.

Movie Rating Website - Full Stack

- Developed a movie rating website using **HTML, CSS, Javascript, Node.js, Express.js** and **MYSQL**.
- Created features for users to add ratings and reviews.
- Integrated rest APIs with the MYSQL database.
- Designed a responsive and user-friendly interface.

AI-Based Research Gap Detection System — MCA Final Year Project

- Developing an AI-based system to analyze research papers and identify possible research gaps.
- Implemented PDF upload and text extraction for research paper analysis.
- Working on NLP-based analysis to identify important keywords, concepts and research areas.
- The system focuses on identifying methodology, dataset and application gaps.
- Developing a simple and user-friendly interface for uploading papers and viewing analysis results.
- Technologies: **Python, NLP, React.js, MongoDB**.

CERTIFICATIONS

- **Java Programming for Beginners** – IBM Skills Network (via Coursera), 2025
- **Introduction to Front-End Development** – Meta (via Coursera), 2025
- **PHP and MySQL Training** – IIT Bombay (via EduPyramids), 2026
- **Full Stack Development Course** – Greens Technologies, 2025
